Residual materials
Processing

As a 100 % subsidiary of Chemische Werke Kluthe GmbH, we support our customers with economically and ecologically reasonable recycling of their accumulating chemicals.

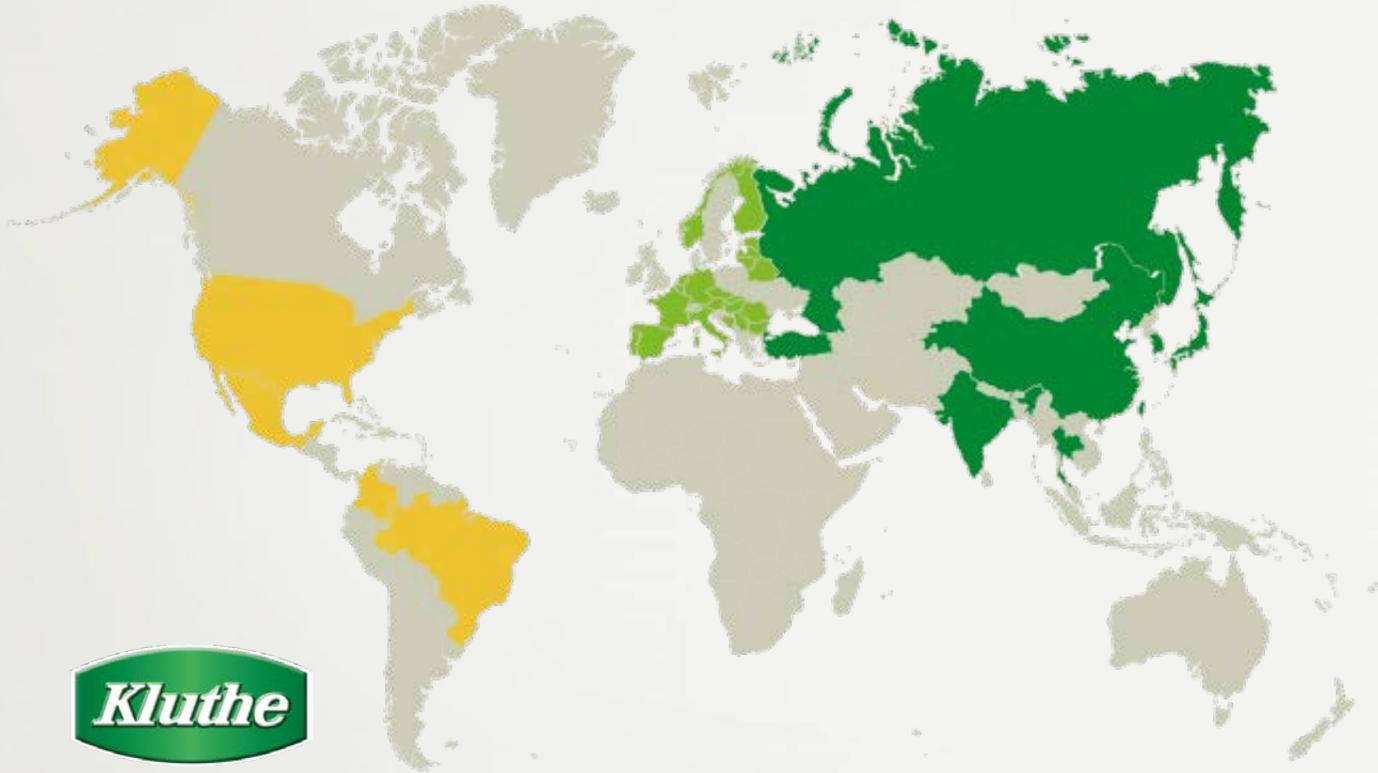

We consider our core competence to be the processing of wasted solvents and solvent-containing sludges. For this purpose, various plants for distillation and drying are operated and recycled in accordance with various patented processes.

Our company also produces complex specialty chemicals for the coating and cosmetics industry.

Our customers are primarily pharmaceutical, cosmetic, chemical and general surface industries.

Production of raw materials

Production of raw materials and consumables

Production of raw materials and consumables for the coating and cosmetics industry as well as for surface treatment

In addition to the recycling activities, our company handles very complex products for the coating and cosmetics industry, which are manufactured by means of dryers, centrifuges and similar plants. This production is continuously expanding.

Our patented processes in the processing of recyclable materials

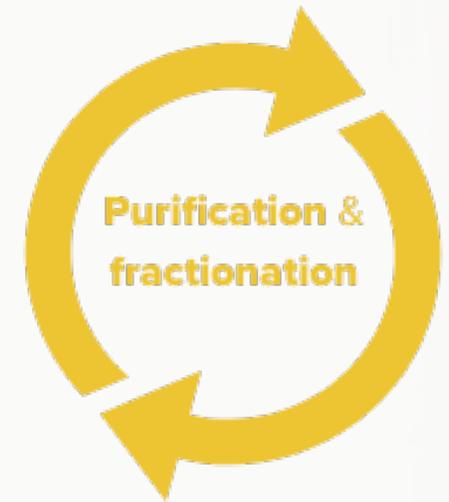

Recovery of recyclable materials from waste coatings, old paints and coating coagulates

Recovery of aqueous coating rinsing liquids

Recovery of organic solvents with simultaneous drying and recycling of distillation residues

Purification and fractionation of organic solvents/contract distillation

The products by Rematec

Alcohols

Ethanol, isopropyl alcohol, methanol

We run an open brandy warehouse

Hydrocarbons

Aliphatics & aromatics

We operate an energy production facility

Ester

Butyl acetate, ethyl acetate etc.

Ketone

Acetone, methyl ethyl ketone etc.

Glycol ethers

Butyl glycol, methoxy propanol etc.

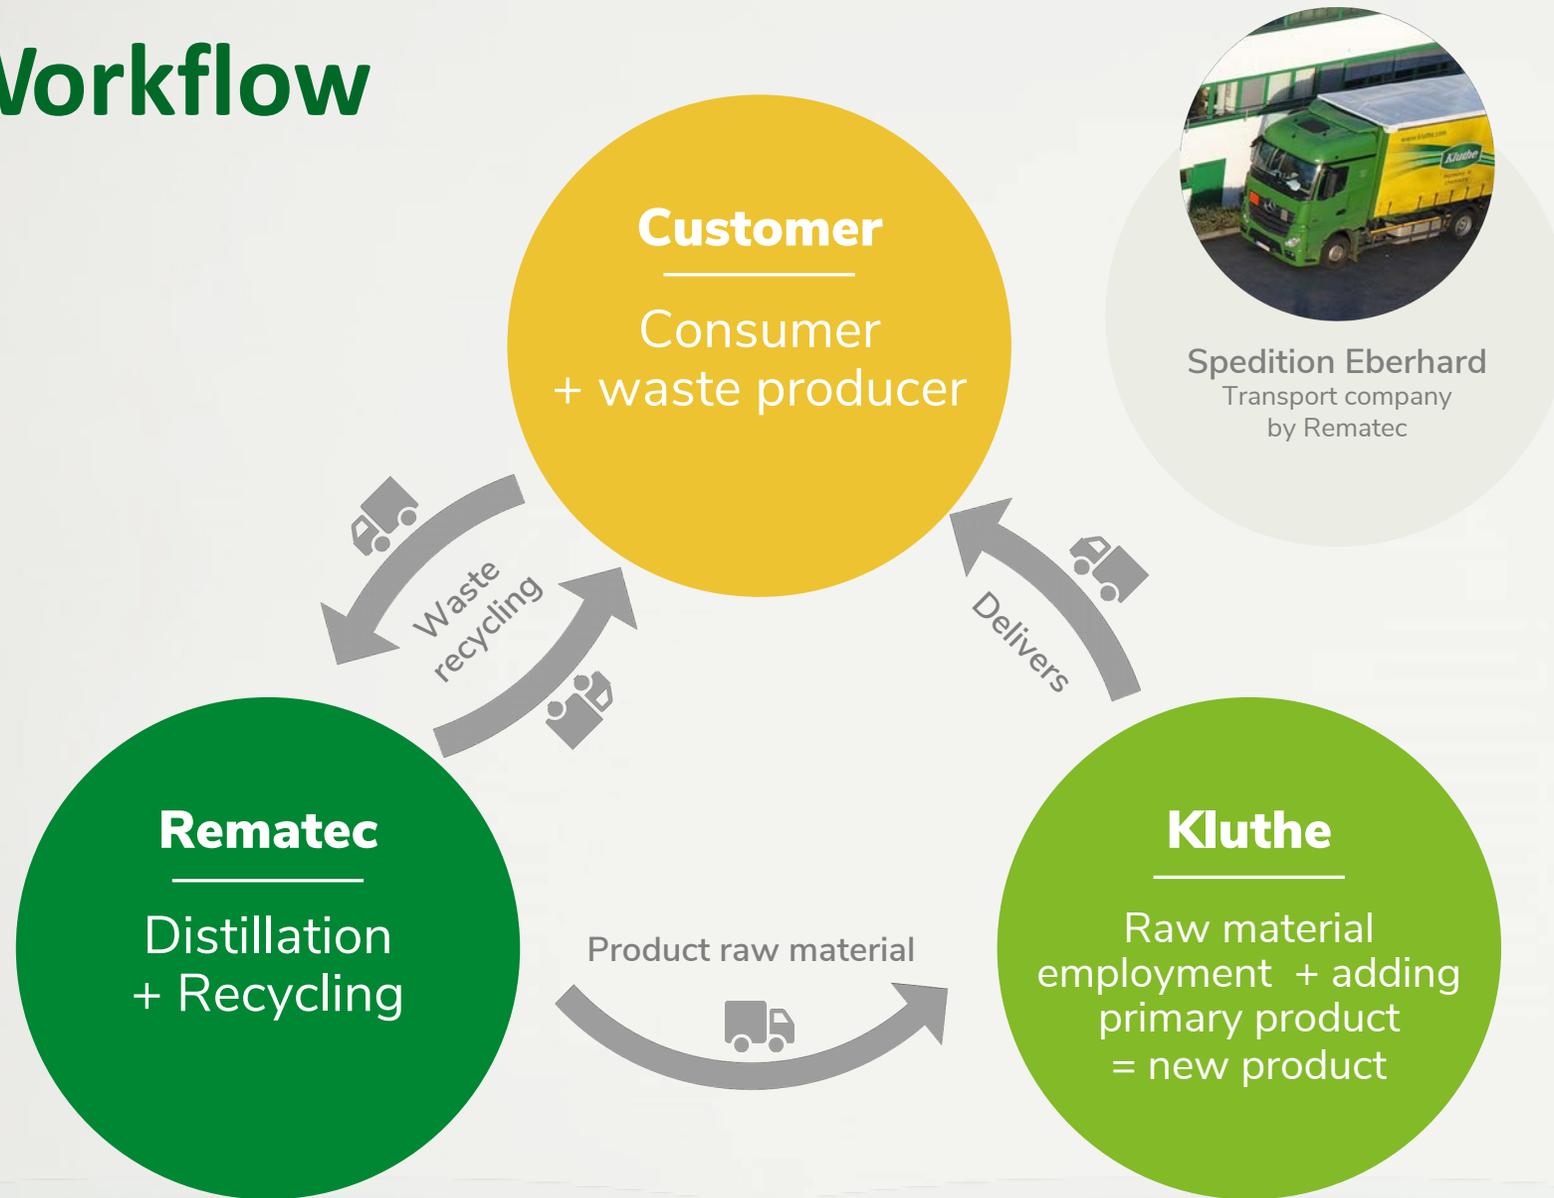

Halogenated hydrocarbons

Methylene chloride

Thinners

Various qualities

Workflow

Spedition Eberhard
Transport company
by Rematec

When surface chemistry is delivered by our parent company Kluthe GmbH and us as solvent recyclers, various synergies are generated. They simplify the processes for consumers and producers – and they also reduce costs. In the field service, usually only one competent employee is available for both companies.
